

TO OUR VALUED CUSTOMERS

Dear Russell Customer,

Thank you for your interest in Edelbrock and Russell products. Russell performance plumbing products continue to be the choice for top racers, hot rod shops and enthusiasts. Racers like Pat Musi, Charlie Booze and John Urist rely on Russell products to keep their race cars running at the top of their class. The same technology and engineering that goes into these products is available to you for your street rod or daily driver!

I know the past few years has been challenging for everybody, not just the automotive aftermarket. During these tough times we continue to work hard to develop new products and provide you with the best quality in the industry.

This 2011 edition of the Russell Performance Automotive catalog is a great example of all of the hard work and dedication our team has contributed to producing these great products. Due to the overwhelming success of our ProClassic hose... we are excited to announce the addition of our new line of ProClassic II hose. ProClassic II hose has the same lightweight high-quality nylon fabric braided cover, but includes a stainless wire braid in the liner for improved routing in tight installations.

To complement our new hose, we are offering a new ProClassic II all-black anodized finish for our most popular hose ends and fittings, providing a great look that complements any hose combination. We also have several new dual carburetor fuel inlet kits now available in ProClassic II for your street rod or muscle car.

Some of our other new products include additional hose end and adapter fitting finish choices for your custom installation needs. Now you can improve braking performance in your 2010 Camaro SS with our new pre-assembled brake hose kit. This kit is a direct-bolt on replacement that reduces hose expansion for more consistent braking.

These are just some of the exciting new products in this edition of the Russell Performance Automotive catalog. Please take time to check out all of the great new products we have available.

We value your business and look forward to seeing you on the road!

Russell ProClassic hose and fittings were used exclusively on the Edelbrock/Musi 555 crate engine in Edelbrock's 1967 SS Chevelle... Long Hauler on the 2007 and 2010 Hot Rod Power Tour
